## Cinematic Trailer Collection

The free pack contains a short “epic trailer”, not present in this collection, but the mood is similar. This collection is useful for game intro or end title screens, trailers, credits, menu, hold screens, or as background music in a game. The pack contains 6 different songs:

- War Operations (looped) (0:56)
- Knight of the dark (loop / no loop) (1:37)
- Infiltration (loop / no loop) (0:46)
- Into the darkness (loop / no loop) (0:37)
- Fallen heroes (loop / no loop / no intro) (1:26)
- Fight with fire (loop / no loop / no intro) (1:26)

[Listen to the song Fight with fire on the background of a stunning 3D animation video](#) and then image your next game trailer or intro with the same soundtrack! :)

The collection will create massive mash-ups and intense experiences that will raise the blood pressure in your audience. The arrangement includes cinematic impacts, risers, thuds, strikes, flybys, whooshes, drones, hums, power shots and hits. It is suited for sci-fi, warfare, action, extreme sports, fantasy, first person shooters, etc

"[Win and lose library vol.1: Vocals](#)" is a collection of vocal shots especially suited for simple and quick platform games, web games, puzzle games etc. You can buy it for 10\$.

It's divided into two sections: WIN and LOSE. You get speech and expressions tailored for the successful game/level ending and for failure events and mistakes. There are a total of 83 words and expressions for win and lose events in high quality wav format, production-ready to be inserted in your game without any processing: you only have to lower the volume to the level needed.

Find the complete demo (ALL the files present in the library) on soundcloud:  
<http://soundcloud.com/bosone/win-and-lose-library-vol-1>

---

"[Win and lose library vol.2: Retro Synth](#)" contains a collection of very short synth arpeggios especially suited for simple and quick platform games, web games, puzzle games and so on. The mood of the synth melodies is WIN and LOSE, with the short musical lines tailored for the successful game/level ending and failure events and mistakes. There are a total of 45 different synth short sequences for both win and lose events, ready to be inserted in your game without any processing: you must only lower the volume at the level needed. You can buy it for 5\$

Find the demo here: <http://soundcloud.com/bosone/win-and-lose-library-vol-2>

Win and Lose library vol.3: Whistling is a collection of whistling phrases especially suited for simple and quick platform games, cartoonish, web games, puzzle games and so on.

It's divided into two sections: WIN and LOSE. In the first case you get tunes tailored for the successful game/level ending, while the second one was created for failure events and mistakes.

There are a total of 34 simple melodies for both win and lose events, ready to be inserted in your game without any processing: you must only lower the volume at the level needed.

"Metal Loop Pack" is collection of short metal loops that loops seamlessly. For your convenience, each loop is divided in several clips:

1) "Complete": this is the short song "as recorded", it plays just once from the beginning to the end. It is not meant to be looped but played one time.

2) "Intro": to be used as an intro, i.e. the first clip to be played. After this you can play the loop part.

3) "Loop": the looped part. If you play this clip immediately after the "intro" part it will seamlessly loop. you can play the "loop" part as many times as you want, in order to get a background music as long as needed.

4) "End": this is meant to be played immediately after the "Loop" clip. In this way you can end the short song in a convenient way.

[Rock Loops Pack](#), 12 loops in rock style, several bars long.

This is a pack of rock loops that share the same tempo and sound. You can loop a single clip or you can try to connect the different clips one after the other to crate more complex soundtrack, even following your gameplay. This loop pack will be part of a more complete asset with tentative name "rock construction kit". It will include loop intro (you find a selection of 3 intros in this pack) and loop outro (you find 5 different ends for the loops). There will also be solos and main melodies included, so stay tuned!

This is the initial release of the asset. It will be expanded with more loops and it will part of a more extended project called "rock loops construction kit", that will be sold separately.

If you purchase this initial release you will encourage me in the development, you will be able to get the future updates of this asset free of charge and to upgrade to the complete "rock loops construction kit" at a discounted price.

As a bonus, you get also some free clips of my other unity3d assets.

### Door Sfx Pack

In this pack you will find a collection of 88 door sound effects, including:

- creak / squeak door close/open (ideal for horror / suspense settings)
  - door close
  - door key lock / latch
  - door handling open / close
- 

Electric organ music loops for casual games, 4 simple yet effective organ "minisongs" loops with positive vibe and happy mood. they will work perfectly in any casual game, platform, child game, puzzle, etc

It has minimal melodic elements so it will not annoy the player and will leave plenty of room for sound effects and voiceovers.

The pack includes 4 different themes that are divided in intro, a looped version (about 1' long), and separate ending clip that can be used to end the song in any moment after level end.

Some of the songs contains also shorter bonus loops/ends that can be used in transitions screens like shops, level intro/end, selections, bonus, etc.

Tracks included:

- Organ Explosion (intro, loop, end)
- The Afterparty (intro, loop, 7 ends, 2 short loops)
- Hot Pepper (intro, loop, end, 2 short loops)
- Bittersweet groove (loop, end, short loop)
